

Online Alumni Interaction by ASHRAE MAIT – 20th October

The ASHRAE Student Branch, MAIT organized an insightful online alumni interaction session on October 20, 2024. The event aimed to provide guidance and share first-hand experiences about the scholarship process, as well as job opportunities within the HVAC&R industry. It was an interactive platform for students to connect with alumni and industry professionals who are actively involved in the American Society of Heating, Refrigerating, and Air-Conditioning Engineers (ASHRAE).

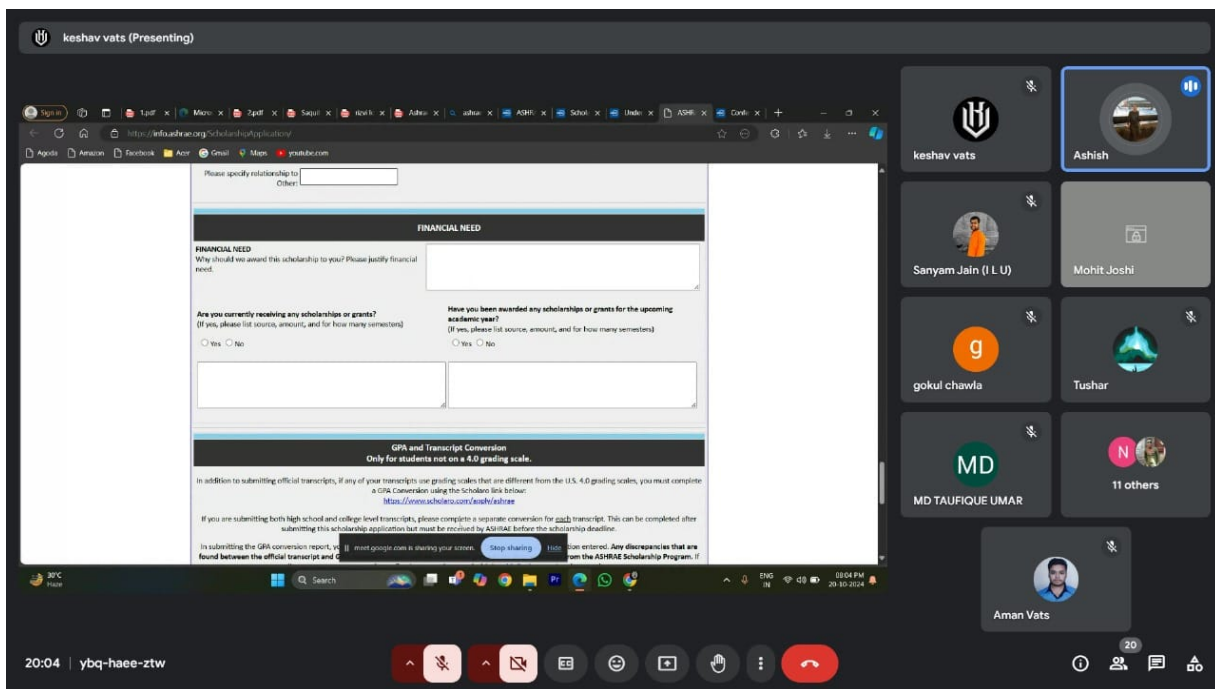

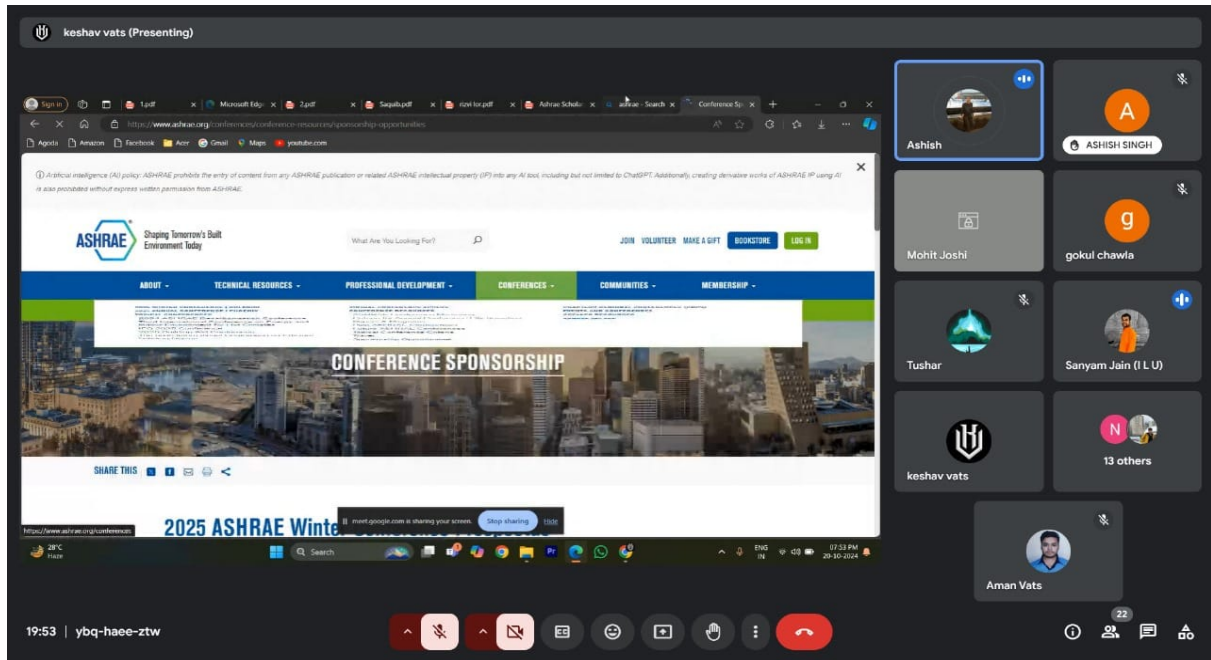

Mr Saquib, Mr Kamran & Mr Sayyam Jain, who are MAIT alumni and members of the ASHRAE society, elaborated on the various scholarships provided by ASHRAE for students. These scholarships are designed to support aspiring engineers pursuing education in the fields of HVAC&R, helping them financially while also offering opportunities for professional development through ASHRAE's network. The alumni discussed the eligibility criteria, application process, and shared valuable tips on how to present a strong application.

Along with scholarships, the alumni provided insights into job opportunities available through ASHRAE's vast professional network. ASHRAE offers job boards, internships, and networking opportunities that enable students to connect with leading professionals in the industry, making it easier for them to secure internships and full-time positions after graduation. The speakers encouraged students to actively participate in ASHRAE events and utilize its resources to enhance their career prospects.

Each speaker shared personal experiences about their journey from being students at MAIT to becoming professionals in the HVAC&R field. They highlighted the importance of being involved in the ASHRAE student branch and the advantages it offers in terms of both academic and professional growth. The online session was well-received by the students, providing them with practical advice and a clearer understanding of how to apply for scholarships and tap into the job market. It also fostered stronger connections between current

students and alumni, reinforcing the support network available through the ASHRAE community.

The ASHRAE Student Branch at MAIT extends its gratitude to the alumni for taking the time to share their knowledge and experiences. The event successfully enhanced student awareness about the resources offered by ASHRAE and the value of building a strong professional network early on.
