Whom It May Concern,

**Subject: Letter of Appreciation for Ankit Rai**

We are pleased to acknowledge the commendable contributions of Mr. Ankit Rai during his tenure as an intern on the Halo-Deck Upgradation Project. This project commenced in June and successfully concluded in January. Ankit actively contributed to the project from November to January, demonstrating dedication, technical acumen, and a strong work ethic.

One of Ankit's key contributions was in designing the housing for the control box of the Gyro Stabilized Horizontal Bar (GSHB) Light. This specialized light is mounted on the mast deck of an Indian Navy ship and plays a critical role in assisting aviator pilots during helideck landings by providing essential reference angles. His work in developing the control box housing was instrumental in ensuring the functionality and durability of the system.

We sincerely appreciate Ankit's efforts and his commitment to excellence. His innovative approach and diligence were valuable assets to the project, and we look forward to witnessing more such contributions from him in the future.

We extend our best wishes to Ankit Rai in his future endeavors and trust that he will continue to excel in his professional journey.

Sincerely,

Rohit Aggarwal

Chief Technical Officer
